

No.B.17018/1/2025-DTO(S)

Dated Siaha, the 18th August, 2025

PUBLIC NOTICE
MANDATORY REGISTRATION AND ACTIVATION OF VEHICLE LOCATION
TRACKING DEVICES (VLTD) ON VAHAN

It is hereby informed for the general public, vehicle owners, transport operators, and all concerned stakeholders that as per the directives of the Transport Directorate, installation and registration of **Vehicle Location Tracking Devices (VLTDs)** on the VAHAN portal has been made mandatory for all public service vehicles and commercial vehicles operating within Siaha District.

The following guidelines are to be strictly adhered to:

Mandatory Installation of VLTD

- All public service vehicles (such as taxis, buses, maxi cabs, and other transport vehicles meant for carrying passengers) as well as commercial vehicles must ensure that VLTD devices are properly installed and in working condition at all times.
- No new public service vehicle shall be registered in VAHAN unless it is fitted with an approved VLTD device.

Registration and Upload of UID on VAHAN

- The Unique Identification Number (UID) and other relevant details of the VLTD will be uploaded to the VAHAN portal directly by the vehicle manufacturer or its authorized agency at the time of sale.
- In cases where vehicles are already on road and VLTDs are being fitted later (retrofitment cases), the VLTD manufacturer/authorized dealer must install the device and ensure real-time registration and activation on VAHAN.

Inspection and Verification

- At the time of registration of the vehicle or renewal of fitness, the Motor Vehicle Inspector (MVI) shall verify the functionality of the VLTD installed.
- If the device is found non-functional, tampered, or not meeting the required standards, the application shall be rejected, and the owner must rectify or replace the device before re-submission.

Post-Approval Monitoring

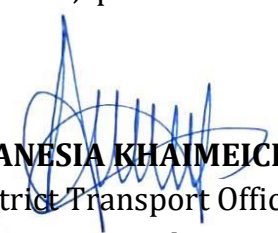

- Once the VLTD is duly installed, verified, and approved, the system shall be integrated with the Command & Control Centre (CCC), enabling 24x7 monitoring of the movement of the vehicle for passenger safety, law enforcement, and emergency response.

Responsibilities of Vehicle Owners and Operators

- Vehicle owners/operators are directed to ensure continuous working condition of the installed VLTD and avoid any tampering or disconnection.
- In case of malfunction, the device must be repaired or replaced immediately through the authorized vendor.
- Failure to comply will invite penal action as per the provisions of the Motor Vehicles Act and rules framed thereunder.

Public Information and Awareness

- This measure has been introduced in the interest of public safety, women and child security, passenger convenience, and better traffic management.
- All vehicle owners and operators are hereby advised to take necessary steps at the earliest to avoid inconvenience during vehicle registration, permit renewal, or fitness certification.

(Dr. MANESIA KHAIMEICHHO)

District Transport Officer

Siaha District, Siaha

Dated Siaha, the 18th August, 2025
